Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)					
	09/687,991	RAWAT ET AL.					
Office Action Summary	Examiner	Art Unit					
	Salad E. Abdullahi	2157					
The MAILING DATE of this communication a Period for Reply	ppears on the cover sheet with	h the correspondence ad	ldress				
A SHORTENED STATUTORY PERIOD FOR REF WHICHEVER IS LONGER, FROM THE MAILING  - Extensions of time may be available under the provisions of 37 CFR after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory perions for reply within the set or extended period for reply will, by state Any reply received by the Office later than three months after the main earned patent term adjustment. See 37 CFR 1.704(b).	DATE OF THIS COMMUNIC.  1.136(a). In no event, however, may a report will apply and will expire SIX (6) MONT tute, cause the application to become ABA	ATION.  Only be timely filed  HS from the mailing date of this control (35 U.S.C. § 133).					
Status							
1)⊠ Responsive to communication(s) filed on 01	June 2005.						
	nis action is non-final.						
3) Since this application is in condition for allow	vance except for formal matte	rs, prosecution as to the	e merits is				
closed in accordance with the practice under	r Ex parte Quayle, 1935 C.D.	11, 453 O.G. 213.					
Disposition of Claims							
4) Claim(s) 1-3,5,8-10,13-16,19-22,24-26 and 3	28-30 is/are pending in the ap	plication.					
4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6) Claim(s) 1-3, 5, 8-10, 13-16, 19-22, 24-26 ar	nd 28-30 is/are rejected.						
7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction and	l/or election requirement.						
Application Papers							
9) The specification is objected to by the Exami	ner.						
10) The drawing(s) filed on is/are: a) a		v the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).							
11) The oath or declaration is objected to by the	•	•	, ,				
Priority under 35 U.S.C. § 119							
12) Acknowledgment is made of a claim for foreign	gn priority under 35 U.S.C. 8	119(a)-(d) or (f).					
a) ☐ All b) ☐ Some * c) ☐ None of:	gri priority arrability	( . ) ( . ) ( . ) .

## Response

- 1. The response filed on 6/1/2005 has been received and made of record.
- 2. Applicant's arguments with respect to claims 1-3, 5, 8-10, 13-16, 19-22, 24-26 and 28-30 have been fully considered but are not persuasive for the following reasons.

Applicant alleges the references fail to teach "form filling program instructions residing on said first computer server for creating a filled form by filling In said blank form using a fuzzy fill procedure" and form submitting program instructions residing on said first computer sewer. Using a result of said form filling program instructions, for automatically submitting said filled form to a second computer server".

Examiner respectfully disagrees because it seems the applicant is arguing the references individually. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Furthermore, Gupta discloses a system for automating data transactions among computer servers, where one computer server receives a form and fills with user information and transmits to another computer server (see figs. 3a, 4a, 4b and col. 10, lines 13-65). Gupta does not show using fuzzy logic, nonetheless the principles of fuzzy logic or artificial intelligence to complete forms is well known in the art and would have been an obvious modification to Gupta system as evidenced by Hitt. Hitt discloses an automated document identification and retrieval system for filling an empty form for

Application/Control Number: 09/687,991 Page 3

Art Unit: 2157

information extracted from database using fuzzy fill procedure (fuzzy logic or artificial intelligence) (see col. 4, lines 51-36). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate the fuzzy fill procedure (fuzzy logic procedure) as taught by Hitt into system such that fuzzy logic is used to automatically fill forms to eliminate the necessity of manual entry of data.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 5. Claims 1-3, 5, 8-10, 13-16, 19-22, 24-26 and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gupta U.S. Patent No. 5,963,949 [hereinafter Gupta] in view of Hitt U.S. Patent No. 6,249,779[hereinafter Hitt]

Art Unit: 2157

As per claims 1, Gupta discloses a system for automating data transactions between computers servers, comprising:

a first computer server (see fig. 1c, 140) maintaining a database having stored data recorded therein, said stored data comprising general user information (users meta data) relating plurality of servers and specific user information (180) associated with a user and maintained at each server of said plurality of servers(see fig. 1c and col. 6, lines 11 28);

program code (applet) residing on said first computer server for creating extracted data by selectively extracting said stored data responsive to a request (see col. 8, lines 15 54); and

additional program code residing on said first computer server for obtaining a blank form, and for parsing said blank form to identify which of said extracted data should be used to fill in at least a part of said blank form (see col. 8, lines 15-54);

form filing program residing on the on the first server for creating a filled form in said blank form using an automated fill procedure (see col. 1, lines 17-39).

submitting the automatically filled to a second server (sending the filled to a selective proxy) (see col. 8, lines 55-67)

Gupta is silent regarding: using fuzzy fill procedure.

Nonetheless, the principles of fuzzy logic or artificial intelligence to complete forms is well known in the art and would have been an obvious modification to Gupta system as evidenced by Hitt. Hitt discloses an automated document identification and retrieval system for filling an empty form for information extracted from database using fuzzy fill

procedure (fuzzy logic or artificial intelligence) (see col. 4, lines 51-36). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate the fuzzy fill procedure (fuzzy logic procedure) as taught by Hitt into system such that fuzzy logic is used to automatically fill forms to eliminate the necessity of manual entry of data.

In considering claim 2, Gupta discloses a system, wherein said extracted data includes data for all fields in said blank form (col. 8, lines 15-54).

In considering claim 3, Gupta discloses a system, wherein said blank form is obtained from a second computer server (form originating server) (see fig. 1c and col. 3, line 65 to col. 4, line 14).

In considering claim 5, Gupta discloses a system, wherein said blank form is a login form (col. 3, lines 44-55).

In considering claim 8, Gupta discloses a system, further comprising:

an additional database maintained at said first computer server (see fig. 1c and col. 6, lines 11-28);

additional database having stored form data recorded therein (see fig. 1c and col. 6, lines 11-28);

Art Unit: 2157

stored form data relating to forms required by at least one other computer server (see fig. 1c and col. 6, lines 11-28).

In considering claim 9, Gupta discloses comparing data fields in said blank form with said stored form data recorded in said additional database (col. 8, lines 15-54).

In considering claim 10, Gupta discloses a system wherein said stored form data includes parsed form data from said at least one other computer server (col. 8, lines 15-54).

As per claim 13, Gupta discloses a method for automating data transactions between computers servers, comprising:

a first computer server (see fig. 1c, 140) maintaining a database having stored data recorded therein, said stored data comprising general user information (users meta data) relating plurality of servers and specific user information (180) associated with a user and maintained at each server of said plurality of servers((see fig. 1c and col. 6, lines 11-28);

program code (applet) residing on said first computer server for creating extracted data by selectively extracting said stored data responsive to a request (see col. 8, lines 15 54); and

additional program code residing on said first computer server for obtaining a blank form, and for parsing said blank form to identify which of said extracted data should be

Art Unit: 2157

used to fill in at least a part of said blank form (see col. 8, lines 15-54);

form filing program residing on the on the first server for creating a filled form in said

blank form using an automated fill procedure (see col. 1, lines 17-39).

submitting the automatically filled to a second server (sending the filled to a selective

proxy) (see col. 8, lines 55-67)

Gupta is silent regarding: using fuzzy fill procedure.

Nonetheless, the principles of fuzzy logic or artificial intelligence to complete forms is well known in the art and would have been an obvious modification to Gupta system as evidenced by Hitt. Hitt discloses an automated document identification and retrieval system for filling an empty form for information extracted from database using fuzzy fill procedure (fuzzy logic or artificial intelligence) (see col. 4, lines 51-36). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate the fuzzy fill procedure (fuzzy logic procedure) as taught by Hitt into system such that fuzzy logic is used to automatically fill forms to eliminate the necessity of manual entry of data.

In considering claim 15, Gupta discloses a system, wherein said blank form is obtained from a second computer server (form originating server) see fig. 1c and col. 3, line 65 to col. 4, line 14).

In considering claim 16, Gupta discloses a system, wherein said blank form is a login form (col. 3, lines 44-55).

In considering claim 19, Gupta discloses a system, further comprising:

Art Unit: 2157

an additional database maintained at said first computer server (see col. 1, lines 18-59 and col. 3, lines 20-65);

additional database having stored form data recorded therein (see col. 1, lines 18-59 and col. 3, lines 20-65);

stored form data relating to forms required by at least one other computer server (see col. 1, lines 18-59 and col. 3, lines 20-65).

In considering claim 20, comparing data fields in said blank form with said stored form data recorded in said additional database (see col. 3, lines 20-64).

In considering claim 21, Gupta discloses a system wherein said stored form data includes parsed form data from said at least one other computer server (see col. 1, lines 18-59).

In considering claim 22, Hitt discloses a system further comprising: as result of parsing filling in said blank form using fuzzy fill procedure (see col. 4, lines 51-36).

As per claim 24, Gupta discloses a system for automating data transactions between computers servers, comprising:

a first computer server (see fig. 1c, 140) maintaining a database having stored data recorded therein, said stored data comprising general user information (users meta data) relating plurality of servers and specific user information (180) associated with a user

Art Unit: 2157

and maintained at each server of said plurality of servers((see fig. 1c and col. 6, lines 11-28);

program code (applet) residing on said first computer server for creating extracted data by selectively extracting said stored data responsive to a request (see col. 8, lines15-54); and

additional program code residing on said first computer server for obtaining a blank form, and for parsing said blank form to identify which of said extracted data should be used to fill in at least a part of said blank form (see col. 8, lines 15-54);

form filing program residing on the on the first server for creating a filled form in said blank form using an automated fill procedure (see col. 1, lines 17-39).

submitting the automatically filled to a second server (sending the filled to a selective proxy) (see col. 8, lines 55-67)

Gupta is silent regarding: using fuzzy fill procedure.

Nonetheless, the principles of fuzzy logic or artificial intelligence to complete forms is well known in the art and would have been an obvious modification to Gupta system as evidenced by Hitt. Hitt discloses an automated document identification and retrieval system for filling an empty form for information extracted from database using fuzzy fill procedure (fuzzy logic or artificial intelligence) (see col. 4, lines 51-36). Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to incorporate the fuzzy fill procedure (fuzzy logic procedure) as taught by Hitt into system such that fuzzy logic is used to automatically fill forms to eliminate the necessity of manual entry of data.

Art Unit: 2157

In considering claim 25, Gupta discloses a system, wherein said extracted data includes data for all fields in said blank form (col. 1, lines 18-59).

In considering claim 26, Gupta discloses a system, wherein said blank form is obtained from a second computer server (form originating server) (see fig. 2, element 14).

In considering claims 28 Gupta discloses a system, further comprising:

an additional database maintained at said first computer server (see fig. 1c and col. 6,

lines 11-28);

additional database having stored form data recorded therein (see fig. 1c and col. 6,

lines 11-28);

stored form data relating to forms required by at least one other computer server (see fig. 1c and col. 6, lines 11-28).

In considering claim 29, comparing data fields in said blank form with said stored form data recorded in said additional database (see col. 3, lines 20-64).

In considering claim 30, Gupta discloses a system, further comprising: an additional database maintained at said first computer server (see col. 1, lines 18-59 and col. 3, lines 20-65);

additional database having stored form data recorded therein (see fig. 1c and col. 6, lines 11-28);

stored form data relating to forms required by at least one other computer server (see fig. 1c and col. 6, lines 11-28).

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

## CONCLUSION

- 7. The prior art made of record and not relied upon is considered pertinent to the applicant's disclosure.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Salad E Abdullahi whose telephone number is 571-272-4009. The examiner can normally be reached on 8:30 5:00. If attempts to reach the

Art Unit: 2157

examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on 571-272-4001. The fax phone number for the organization where this application or proceeding is assigned is **571-273-8300**.
